THINSLABZ[®] Applications

StoneVic International Inc. is a National distributor of ultra thin laminated natural stone panels. Our ThinSlabz[®] are comprised from the highest quality blocks of marble, onyx, travertine, limestone & granite, which are then laminated with durable reinforced backers.

The total thickness of each ThinSlabz[®] is 8mm. By using advanced equipment and technology, we are able to slice the blocks into 3-7mm veneer pieces and then adhere different reinforced backers. This process allows for the panels to be strong, lightweight, flexible, durable and very easy to handle.

- Tub and Shower Surrounds
- Focal Walls
- Fireplaces
- Elevators
- Boats
- Wainscoting
- Airplanes

ThinSlabz[®] Backers/Applications

- Aluminum Composite Plastic (Interior)
- Transparent Fiberglass (Interior)
- Transparent PVC (Interior)
- Glass (Interior)
- Honeycomb (Interior/ Exterior)
- Ceramic (Interior/Exterior)

Thin
Lightweight
Flexible
Durable

PRODUCT ADVANTAGE

1/3=0.333 Material Weight

ThinSlabz® only require 1/6-1/3 of stone material compared to the traditional stone slab. Each ThinSlabz® sheet weighs approx. 2 lbs per square foot compared to traditional 2 CM slabs that weigh 12 lbs per square foot. The lightweight panels allow for easy transport and installation.

ECO Building Materials

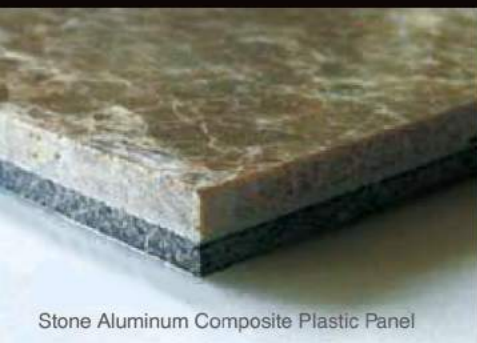

ThinSlabz® provide a more sustainable surfacing material by:

- Reducing water and energy consumption
- Reducing raw material waste during production
- Reducing packaging materials
- Reducing transportation costs
- Increases the square footage of material per container.

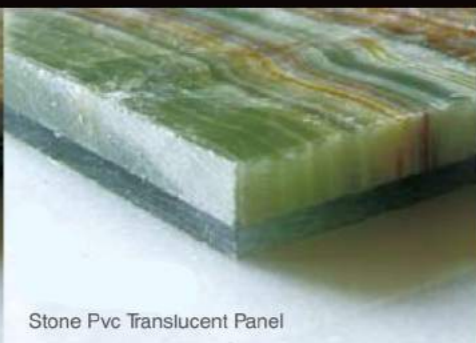

100% Natural Surfacing

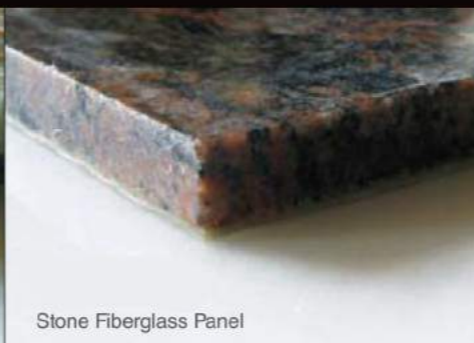

ThinSlabz® are fabricated with immaculate craftsmanship and only use the highest quality marble, onyx, granite, travertine & limestone selection. Most ThinSlabz® can be bookmatched from the same slab to provide an exceptional and unique design.

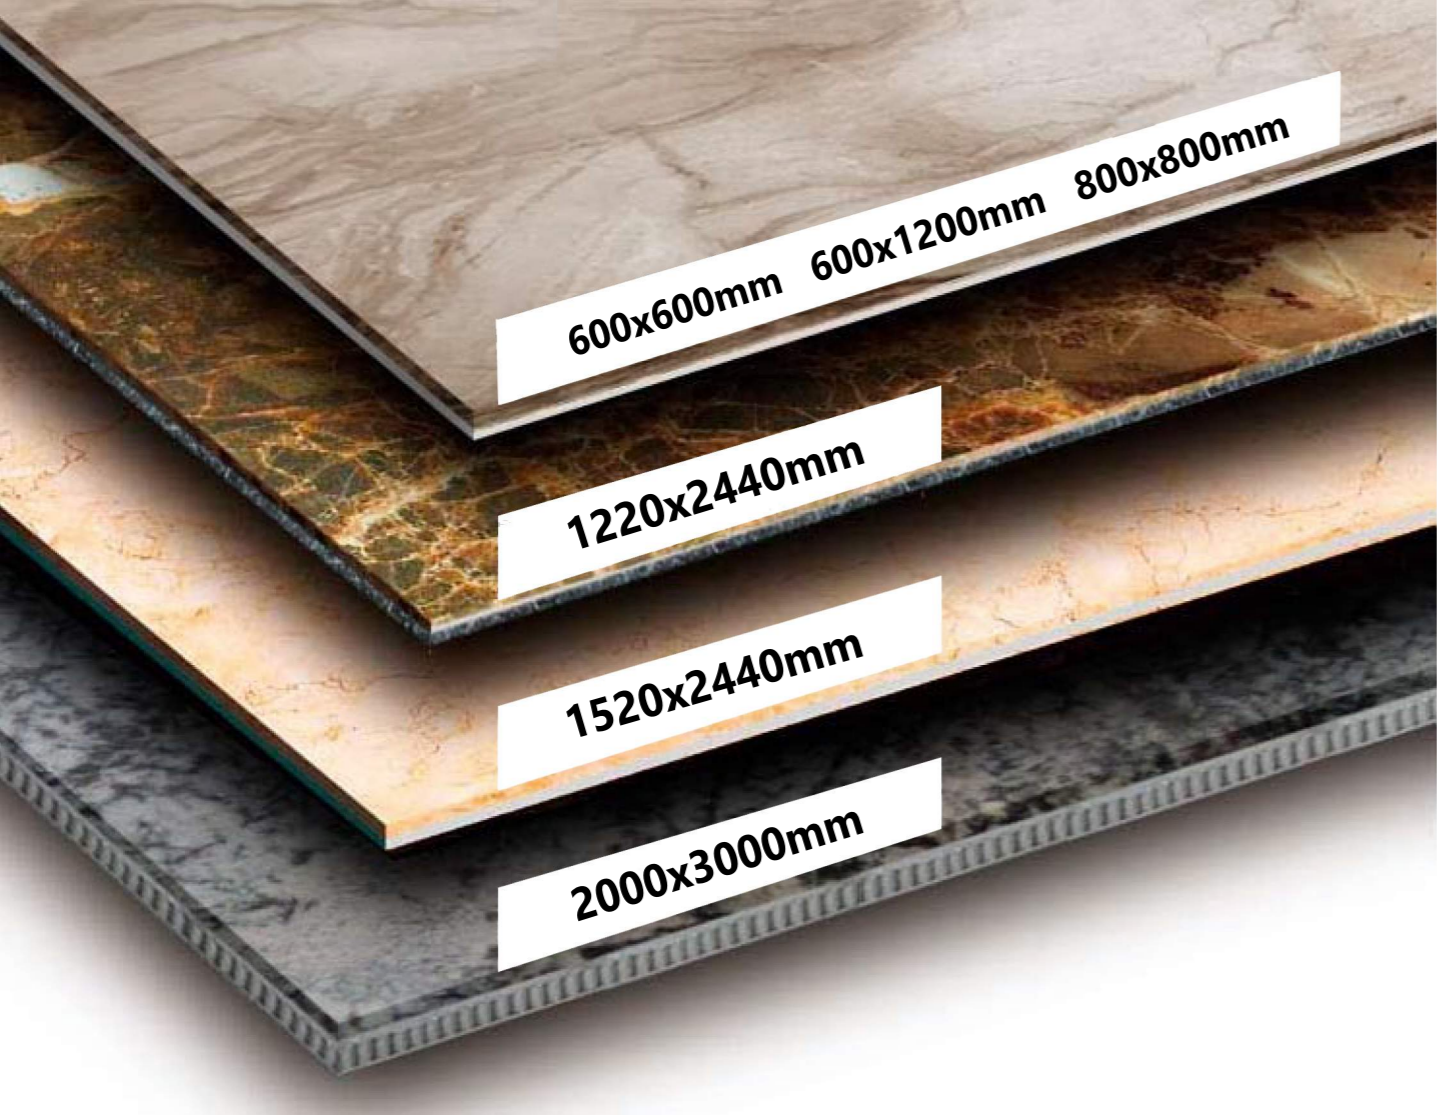

Stone Aluminum Composite Plastic Panel

Stone Pvc Translucent Panel

Stone Fiberglass Panel

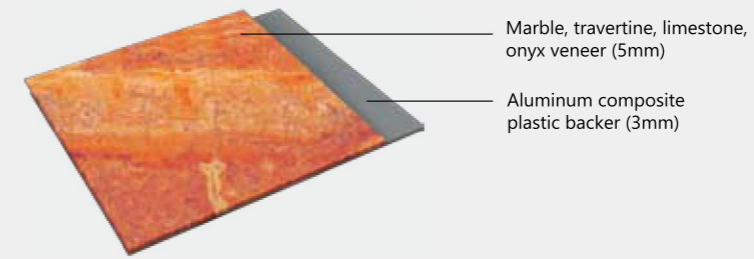

ThinSlabz® Stone Ceramic Composited Tile

3 mm of stone with 9-14mm porcelain backers. It is much stronger than natural stone itself. It is widely applied both in interior and exterior including floor application.

Thin Slabz® Stone Aluminum Composite Plastic Panel

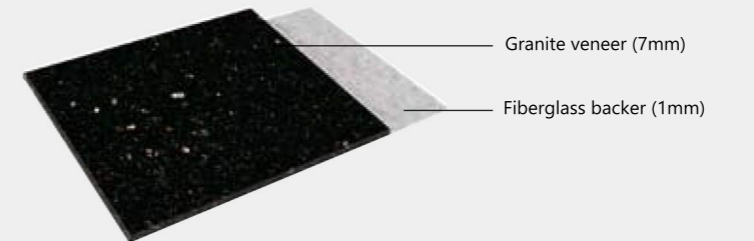

3 mm thick ACP laminate backing applied with 5 mm stone for a high-strength, lightweight and durable panel.

ThinSlabz® Stone Translucent Panel

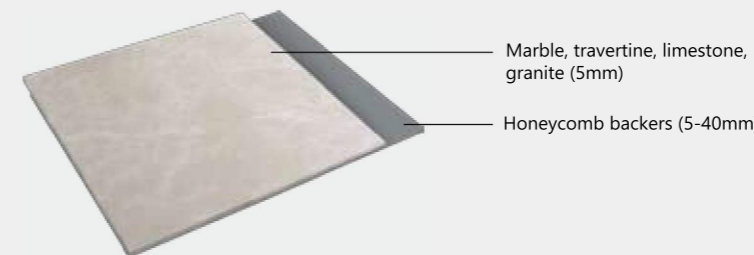

Various thickness of engineered plastic laminated on onyx or translucent marble and granite. Used to keep the materials translucent character and adds a unique brightness to the project or space.

ThinSlabz® Stone Fiberglass Panel

1 mm fiber glass cloth epoxy backing applied for a thin, strong and durable application.

ThinSlabz® Stone Honeycomb Composited Panel

5mm of stone bonded with 40mm thick honeycomb backers. Allows for larger size, lighter weight and it is much stronger than natural stone itself. It is widely applied in both interior and exterior.

ThinSlabz® vs. Other Materials

	THICKNESS (APPROX)	WEIGHT (APPROX)	MAX SIZE (APPROX)	STABILITY	TRANSPORTATION	INSTALLATION
ThinSlabz®	8mm	3.5 lbs	60x90 in.	High Intensity, Strong, Durable, Flexible	Lightweight (saves \$ freight) Not easily broken	No Cement Adhesive Uses Less Grout Low Labor Cost Fast Installation
Traditional Stone	20mm	12 lbs	48x95 in.	Very Fragile	Heavyweight Easily Broken	Cement Adhesive Uses More Grout Higher Labor Costs Slow Installation
Ceramic	8-15mm	5.2 lbs	35x48 in.	Very Fragile	Heavyweight Easily Broken	Cement Adhesive Uses More Grout Higher Labor Costs Slow Installation

Bookmatched ThinSlabz[®] create a seamless, unique and unsurpassed visual design experience.

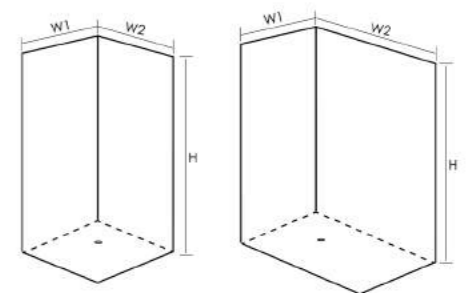

ThinSlabz® Shower Kits

Specially designed packages that offer specific sized Thin Panels for tub/shower surrounds along with customized trims, soap dishes, wall boxes, shower curbs & floor tiles in all of our premium natural stone materials.

	W1	W2	H
1	36"	36"	84"/96"
2	36"	48"	84"/96"
3	48"	48"	84"/96"
4	48"	60"	84"/96"

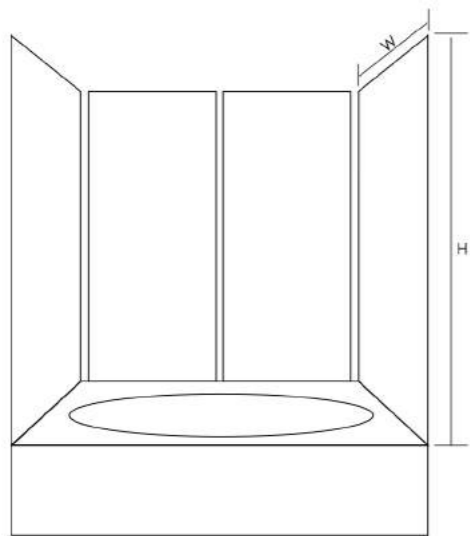

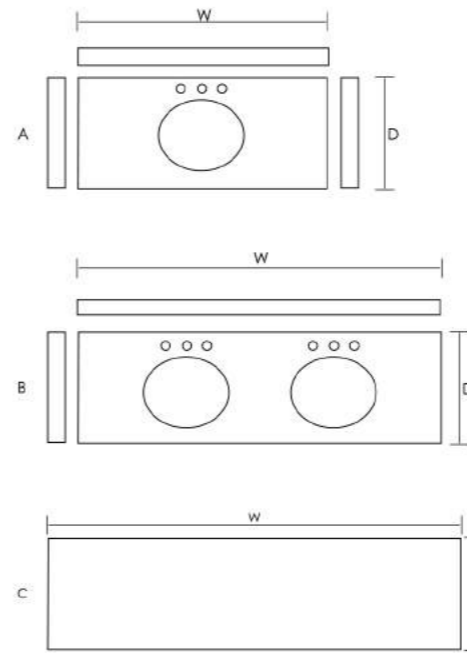

StoneVic International Inc. offers matching solid surface stone tops with our ThinSlabz[®] for a continued elegant design.

Standard sizes noted below.

	W	H

INSTALLATION GUIDE

StoneVic International Inc. ThinSlabz[®] are an ideal choice for new construction, remodeling or repositioning projects.

ThinSlabz[®] can be applied directly over pre-existing surfaces, such as ceramic, stone and wood.

ThinSlabz[®] also minimize waste, lessen the cost of labor and saves on installation time.

1 Clean the existing surface.

2 Gule the panel directly to the existing wall surface.

3 Cover the StoneVic trim on the exposed edge profiles.

4 After installation.
